Hi Gary,

Good catch ...that was my place holder to say the Level B would take place sometime between Thursday and next week – figured once you and Ben talked tomorrow you/he would give us more definitive dates.

Jeff mentioned the Removal Assessment and RM before he bailed to the sunny beaches of Florida. Glad he is resting up !

Let me know if you want more detailed cost estimates. Samantha tried to cut her thumb off over the weekend so she has stitches and is office bound...I can put her to work tracking cost !

Goodnight

CeCe:

Everything looks good until the "Thursday - Next Week?".

I intend on issuing a TDD at some point for doing a Removal Assessment followed by a TDD for Removal Support.

We probably need to discuss.

Thanks

Gary Moore

Subject: ER Activation - Update on CES Environmental ER (Houston)

Mike and Will,

I wanted to give you an update on the ER going on in Houston. Below is a summary of site activities we are conducting under the direction of Gary Moore.

Initial activities over the weekend included :

- Two STARTs on site
- Air monitoring on and off site
- Documenting spill pathways of chemicals and surface water that has left site, potentially into surrounding residential neighborhoods and municipal storm sewer system
- Establishing Response Manger site with photos
- Collecting water sample for analysis

Next phase of response (Mon – Wed) will include:

- Addition of staff mobilized: Total of 4 STARTs on Monday ramping up to 6 or 7 STARTs by Wed COB
- Preparation of full HASP for Level B work
- Preparation of QASP for sampling and analysis
- Repair of perimeter fencing
- cursory inventory of drums, totes and tankers to determine
 - o integrity of containers,
 - o safety/compatibility of chemicals as labeled
 - o volume of container contents
- Collection of additional air, soil and waste samples for analyses

Later this week (Thursday – next week ?): anticipate field team of approximately 8 STARTs

- Level B work to include sampling, Hazard Categorization, and analytical testing of container contents

I prepared a cost estimate (see attached) for the work conducted and projected cost through Wednesday of this week (August 6) = \$69,000.

I can send daily chronologies with site activities, number of STARTs and estimated daily cost if you want this type of information. Please let me know if you have any questions.

Thanks

Cecilia H. Shappee, P.E.
